**TARIFF VALUATION OF SUGAR.**

The following statement shows in respect of each of the descriptions of sugar distinguished in the Tariff Schedule II (excepting molasses and all other kinds of sugar), *first*, the total imports into India in the month of October 1917, and the average value per cwt. as calculated on the returns received from the Customs Houses; and, *secondly*, a running total showing the total imports into India since the beginning of the year (1st October to 30th September) and the average net value per cwt. so far established. It is published in conformity with the procedure laid down in Customs Circular No. V of 1911, in order to enable merchants to compute the probable rate of duty for the year 1919:—

## DEPARTMENT OF STATISTICS, INDIA.

### TRADE FLUCTUATIONS IN SELECTED ARTICLES IN SEPTEMBER, 1917.

The object of the tables appended is to show the quantities of the principal staples of agricultural produce imported from the various provinces, etc., and from foreign countries into the ports of Calcutta, Bombay, and Karachi, and into the Madras ports during the month of September, 1917, and for the six months April to September, 1917, as compared with the corresponding periods of 1916. The statistics include foreign sea-borne and coasting trade as well as inland (rail and river-borne) trade. They have been furnished by Collectors of Customs, Steamer Companies, Railway Audit Officers, the Commissioners for the Port of Calcutta, etc.

#### TRADE FLUCTUATIONS IN SEPTEMBER, 1916 AND 1917.

It will be seen from Table I, that the imports by rail, river, and sea in September, 1917, as against the corresponding month of 1916, show (in round numbers) a decrease of—

74 per cent in linseed.

(7,700 tons as against 29,900 tons last year.)

57 per cent in rape and mustard seed.

(8,100 tons as against 18,800 tons last year.)

47 per cent in jute.

(468,500 bales as against 882,500 bales last year.)

22 per cent in raw cotton.

(55,200 bales as against 70,700 bales last year.)

19 per cent in wheat (excluding wheat flour).

(124,500 tons as against 153,600 tons last year.)

17 per cent in tea.

(30,378,600 lbs. as against 36,581,800 lbs. last year.)

The imports of gram and pulse by rail, river and sea into ports show an increase of 37 per cent (46,800 tons as against 34,200 tons last year) due mainly to larger exports from the Punjab. The increase of 6 per cent (75,300 tons as against 70,900 tons last year) in the imports of rice (including paddy) is accounted for by larger exports from Bengal and Burma.

It will be seen from Table IV (wheat, excluding wheat flour) that the principal source of the imports in September, 1916, was the Punjab. During the corresponding month of 1917 also, the Punjab sent by far the largest quantity, namely, 59 per cent of the total.

---

NOTE.—One bale of cotton or jute is equivalent to 400 lbs.

One maund is equivalent to 82½ lbs.

One maund of paddy is taken as equivalent to 25 seers of rice.

GENERAL RESULTS—SIX MONTHS' IMPORTS INTO THE PORTS FROM UP COUNTRY, ETC., THIS YEAR AND LAST YEAR.

The six months' figures in table I show (in round numbers) a decrease of—

61 per cent in linseed

(101,500 tons as against 259,000 tons last year.)

33 per cent in rape and mustard seed.

(74,500 tons as against 111,500 tons last year.)

19 per cent in jute

(1,470,500 bales as against 1,810,900 bales last year.)

9 per cent in rice (including paddy)

(460,200 tons as against 505,900 tons last year.)

3 per cent in tea

(114,310,800 lbs. as against 117,778,200 lbs. last year.)

The imports of wheat (excluding wheat flour) by rail, river and sea into ports show an increase of 95 per cent (1,423,800 tons as against 731,700 tons last year) mainly on account of larger exports from the Punjab, the United Provinces, Rajputana and Central India and the Central Provinces and Berar. The increase of 92 per cent (408,000 tons as against 212,000 tons last year) in gram and pulse is accounted for by larger exports into the ports chiefly from the Punjab. The imports of raw cotton show a rise of 64 per cent (1,804,200 bales as against 1,097,500 bales last year) owing to larger exports principally from Bombay.

TRADE FLUCTUATIONS IN SEPTEMBER, 1917, AS COMPARED WITH THE PREVIOUS MONTH.

As compared with August 1917, the imports in September 1917 into the ports referred to above show (in round numbers) a decrease of—

59 per cent in raw cotton

(55,200 bales as against 135,400 bales previous month.)

48 per cent in linseed

(7,700 tons as against 14,800 tons previous month.)

21 per cent in wheat (excluding wheat flour)

(124,500 tons as against 157,200 tons previous month.)

19 per cent in tea

(30,378,600 lbs. as against 37,540,700 lbs. previous month.)

14 per cent in rice (including paddy)

(75,800 tons as against 87,900 tons previous month.)

and an increase of—

77 per cent in rape and mustard seed

(8,100 tons as against 4,600 tons previous month.)

47 per cent in gram and pulse

(46,800 tons as against 31,800 tons previous month.)

17 per cent in jute

(468,500 bales as against 399,000 bales previous month.)

The statistics for September 1916 and 1917, as also for the six months ending September 1916 and 1917, together with those for August and September 1917 are summarised below:—

- (a) To pay expenses incurred in connection with the illness of a subscriber or a member of his family.
  - (b) To pay for the passage of any member of a subscriber's family coming from beyond the sea to join him, or requiring to make a journey beyond the sea.
  - (c) To pay expenses in connection with marriages, funerals or ceremonies which by the religion of the subscriber it is incumbent upon him to perform and in connection with which it is obligatory that expenditure should be incurred.

**NOTE.**—Advances, though not confined rigidly to the objects laid down in clauses (a) to (c) above, will be made with due regard to the principle expressed in clause (1) of this rule as illustrated by the foregoing examples.

The order sanctioning the advance should state the specific purpose for which the advance is granted. Where, however, this is of a confidential nature, it may be communicated to the audit officer personally and confidentially.

(3) When one or more advances have already been granted to a subscriber, a subsequent advance shall not be granted to him except for strong reasons to be recorded in writing by the Cantonment authority until at least twelve months have elapsed since the complete re-payment of the last advance taken.

6-B. (1) Advances will be recovered at the discretion of the Cantonment authority, in not less than twelve instalments or more than twenty-four. A subscriber may, however, at his option make repayment in less than 12 instalments or may repay two or more instalments at the same time.

(2) In determining the advance to be sanctioned, due regard should be paid to the amount of subscriptions lying to the credit of the applicant. The amount of the advance should be a sum expressed in whole rupees and ordinarily, the monthly instalments should also be in whole rupees, the advance applied for being raised or reduced, if necessary, to enable instalments to be thus fixed.

(3) Recoveries will be made monthly, commencing from the first payment of a full month's salary after the advance is granted, but no recovery will be made from a subscriber while he is on leave of any kind.

(4) When two or more advances are made, each advance should be treated separately, and the monthly deduction of not less than one twenty-fourth of each advance should be made until that advance is cleared.

(5) The instalments will be paid by compulsory deductions from salary, and will be in addition to the usual subscription.

6-C. When an advance is repaid, as regards principal, in not less than twelve instalments, a 13th instalment, representing interest, and equivalent to 3 per cent. of the amount of the advance, should be paid in the month following that in which the last instalment is paid. Similarly, an additional instalment equivalent to 6 per cent. of the total amount of the advance should be paid when the advance is repaid in more than 12 instalments. In calculating the  $\frac{3 \text{ per cent.}}{6 \text{ per cent.}}$  instalment as above, a fraction of a rupee should be taken at the next higher whole rupee, if it exceeds eight annas, and should be ignored, if it does not.

SENATE HOUSE,

The 26th November, 1916.

**OFFICE OF THE TEA COMMISSIONER FOR INDIA.****NOTICE.***Government Purchase of Tea for the United Kingdom.*

Notice is hereby given that the Food Controller in England proposes to purchase direct in India and Ceylon all tea required for consumption in the United Kingdom. The basis of payment is still under discussion, but it has been decided that each estate will be invited to tender to supply a proportion of its crops, the proportion being fixed on the basis of average production in the year, 1914, 1915 and 1916, with a special allowance in the case of new estates and of extensions of estates now coming into bearing. Statistics are, therefore, required by the undersigned showing, in respect of each estate in India which wishes to participate in the scheme, the crop manufactured in the years 1914, 1915 and 1916 and, in the case of newly opened out estates and of estates with new extensions coming into bearing, in addition, figures showing the actual crop manufactured in 1917 and the estimated crop in 1918. Information is also required as to the area under tea in full bearing, as well as of that under new tea which will come into full bearing in 1918.

In the case of tea estates situated in Bengal and Assam, these statistics are being collected by the Indian Tea Association. The Calcutta Agency Houses will furnish the information in respect of all estates in their Agencies, while that in respect of estates not represented in Calcutta will be obtained through the District Committees of its Assam and Surma Valley Branches and of the Duars and Darjeeling Planters Associations. In the case of tea estates situated in Madras, Bihar and Orissa, and the United Provinces, Local Governments have been asked to arrange for the collection of the statistics required. Those relating to the district of Kangra in the Punjab are being collected by the Deputy Commissioner of that district.

The statistics of outturn furnished by private concerns or concerns which do not publish regular accounts, as well as crop estimates of new extensions coming into bearing, will be verified by local Committees of tea planters appointed by local Associations where such exist.

It is essential that the above statistics should be furnished as soon as possible in order to enable the undersigned to work out the quantity of tea to be supplied by each estate. The above information must be submitted in accordance with the instructions contained in this notice not later than the 15th December 1917.

Tea Commissioner for India.

Public room, open 11 a.m. to 4 p.m.; Saturdays, 11 a.m. to 1 p.m.

1. *All communications* relating to applications for patents and for registration of designs under the Indian Patents and Designs Act (II of 1911), or in continuation of applications under the Inventions and Designs Act (V of 1888) should be addressed to the Controller of Patents and Designs, 1, Council House Street, Calcutta. Documents sent by post should be carefully packed.

2. *Directions* for the guidance of inventors and others are given in the Patent Office Handbook (price one rupee) which contains the Indian Patents and Designs Act, 1911, the Indian Patents and Designs Rules, 1912, the Indian Patents and Designs (Temporary Rules) Act, 1915, the Indian Patents and Designs (Temporary) Rules, 1915, together with current regulations and instructions. These should be consulted before an application is made to the Controller.

3. *Advice.* The Patent Office cannot undertake (1) to give opinions on the interpretation of Patent Law, or on the advisability of protecting inventions and designs or on their infringement; (2) to make searches in respect of information available in the public room; (3) to recommend any particular agent; or (4) to assist in the disposal of inventions. Applicants are warned that the Indian Patents and Designs Act, 1911, is in force in British India only, and patents granted under it do not extend to the United Kingdom or any of the British possessions. The International Convention for the Protection of Industrial Property does not include India. For information regarding patents in countries other than India applications should be made to the patent offices in the countries concerned.

4. *Fees* are payable in *cash* and must be received in the Patent Office within the time allowed by the Acts. When cheques are offered in payment of fees, it must be clearly understood that the office cannot hold itself responsible for any delay that may occur in the collection of cash on the cheques; any cheque not payable in Calcutta is subject to commission. In cases where it is not possible to have the fees handed in at the Patent Office, it is preferable to send them by money-order or postal order payable at Calcutta to the Controller of Patents and Designs, and to advise him that they have been so sent. Stamps will not be received in payment of fees.

5. *Trade and property marks and names* are not registered and *medicines* are not patented under the Indian Patents and Designs Act. There is no provision of Law in British India for their registration. Neither does this Act deal with *pictures, photographs, etc.*, for which copyright is obtainable under the Indian Copyright Act, 1914.

6. *Printed Specifications* of applications, which have been accepted, are published within about three weeks after acceptance has been notified in the *Gazette of India*. These specifications can be purchased at the Patent Office at a uniform price of 8 annas

#### FIELD OPERATIONS.

**No. 2143.**—The following despatch from General Sir Charles Monro, G.C.M.G., K.C.B., Commander-in-Chief in India, on military operations in the Indian Empire, from 10th March 1916 to 31st March 1917, which appeared in the London Gazette, dated 31st October 1917, is published for general information.

*Army Headquarters, India,  
Simla, 23rd July, 1917.*

From the Commander-in-Chief in India, to the Secretary to the Government of India,  
Army Department.

SIR,

In continuation of my predecessor's despatch, dated 9th March, 1916, on the minor military operations undertaken, since the outbreak of the present war, on the North-West Frontier of India and elsewhere in the Indian Empire, including Aden, I have the honour to submit the

following despatch, which deals with operations subsequent to the above date up to 31st March, 1917. They are described in the following order :—

- .Aden.
- South Persia.
- South-East Persia.
- Mekran Mission.
- Jhalawan.
- North-West Frontier.
- Protection of the Indian coasts.

## 2.—ADEN.

During the period under review our forces have been in occupation of the Shaikh Othman—Imad line covering Aden, and facing the Turkish forces in Lahej and south-east of that place.

Throughout the year our troops have been in constant contact with the enemy, engaging in numerous outpost and patrol skirmishes.

The Turks made only one attempt to assume the offensive. On 16th March, 1916, they attacked Imad in force. The enemy was beaten off without difficulty and withdrew, followed up by the garrison and by the movable column from Shaikh Othman.

An attack was made on the Turkish posts at Jabir and Mahat on 7th December, 1916, in which the enemy casualties were estimated at 200. The action is reported to have had a demoralising effect on the Turkish Arab auxiliaries, and to have produced the intended result, *viz.*, preventing the withdrawal towards the Yemen of Turkish troops from Lahej.

In maintaining the active defence of Aden during this period, the assistance and co-operation of the Royal Navy, which has been readily afforded at all times, has been invaluable.

## 3.—OPERATIONS IN SOUTH PERSIA.

Owing to disturbances in Southern Persia and the consequent necessity for raising a Persian force under British officers to enable the Persian Government to restore and maintain order, a mission under Brig.-Gen. Sir Percy Sykes, K.C.I.E., C.M.G., was despatched from India.

With a military escort of all arms amounting to about 500 men, Sir P. Sykes marched from Bandar Abbas, *via* Kerman and Yazd, to Isfahan, where he joined hands with the Russians. Subsequently, the mission moved south to Shiraz, where it now is. The Persian force is in process of formation.

No opposition was met with on the march. Portions of the force under Sir P. Sykes were, however, in action on the occasions mentioned below.

In September, 1916, a mixed force was despatched from Isfahan under the command of Major S. M. Bruce, *Lancers*, to bring in a large convoy which was held up by raiders on the Lynch Road, some 50 miles from Isfahan. On the return journey the convoy was attacked near Koleh-i-Shahi. The raiders were dispersed with considerable loss, and the convoy reached Isfahan in safety.

After the arrival of the mission in Shiraz, a rising broke out in Kazerun and neighbourhood on 17th December. A detachment of all arms was sent out from Shiraz, but, meeting with strong resistance at the Pir-i-Zan Pass, it withdrew to Shiraz.

A small force, under the command of Major L. C. Wagstaff, operating in the district of Sirjan, drove a force of Baharlus and rebels from the town of Saidabad on the 28th September, 1916.

## 4.—OPERATIONS IN SOUTH-EAST PERSIA.

In conjunction with the Russians a small force was maintained in Eastern Persia to ensure the tranquility of this region and frustrate the activity of German agents. Raids on the lines of communication of the force were made by certain tribes of Persian Baluchistan, notably the Damanis of Sarhad. In order to prevent these, and to control the Damanis, Brig.-Gen. R. E. Dyer, Commanding in Eastern Persia, moved a part of his force to Khwash in May, 1916.

In July the hostile attitude of the Damanis necessitated punitive measures. The Damanis are divided into two main sections, the Yarmahomedzais and the Gamshadzais. Brig.-Gen. Dyer determined to move to Gusht in order to intervene between these two sections, and to deal with each in detail. Operations in the vicinity of Gusht from 12th July to 29th July resulted in the capture of the bulk of the Yarmahomedzai flocks and herds, the infliction of considerable loss, and the separation of the two Damani sections. During this period several small actions were fought under trying conditions of climate and terrain, the chief engagement being one at Kalag, near Gusht, on 21st July.

During August General Dyer traversed without opposition a large part of the Gamshadzai country, returning to Khawash on 24th August.

On the 5th October, 1916, Brig.-Gen. Dyer returned to India on account of ill-health, and was succeeded in command of the Sistan force by Brig.-Gen. C. O. Tanner.

As a result of the above operations agreements were arrived at with the chiefs of the Damanis, by which they promised to pay certain fines and to refrain from future hostility. The fines imposed have now been paid in full, and the settlement has allowed of a portion of the Sistan force being withdrawn to Quetta.

The troops maintaining a cordon in Sistan were engaged with hostile bodies on three occasions.

At Lirndik on 13th April, 1916, a force of 70 men of the Punjabis with a party of levies under Captain A. D. Bennett, Punjabis, inflicted considerable loss on a lashkar estimated at 700 men.

At Kalmas, on 26th September, a party of 23 men of the Light Cavalry and 36 levies, under the command of 2nd Lt. Wahl, attached Light Cavalry, defeated a party of gunrunners, capturing a large number of rifles, ammunition, and camels. 2nd Lt. Wahl was killed on this occasion.

Near Chorab, on the 24th March, 1917, a party consisting of 16 men of the Light Cavalry and one British officer and 25 men of the Punjabis, the whole under the command of Captain J. A. C. Kreyer, Cavalry, attacked a gunrunner's caravan. The whole of the transport of 20 camels, as well as 447 rifles and some 23,600 rounds of ammunition were captured.

#### 5.—MEKRAK MISSION.

In view of the disturbed state of the Mekran border, due in a great measure to the intrigue of German agents, a political mission under Major Keyes, of the Political Department, traversed this region with a regular escort of one platoon Gurkha Rifles, one company Baluch Light Infantry, and one section Indian Field Ambulance, escort being under the command of Captain C. H. G. H. Harvey-Kelly, Baluch Light Infantry. This mission left Gwadur in April, 1916, traversed Persian Baluchistan as far north as Khwash and returned to Chahbar, arriving on the 2nd February, 1917. No opposition was met with but the march was a trying one for the troops, and it has had results which appear to have been very satisfactory. The mission escort co-operated with General Dyer's force in dealing with the Damanis referred to in paragraph 4.

#### 6.—OPERATIONS IN JHALAWAN.

During the first half of 1916 considerable unrest existed amongst certain Jhalawan tribes of the Kalat State who had organised roving bands of marauders to terrorise the country.

It was decided to send an escort with Lt.-Col. A. B. Dew, C.S.I., C.I.E., the Political Agent, Kalat, to restore order in that region.

The services of this officer in connection with these disturbances have been brought to favourable notice.

The escort, under the command of Lt.-Col. C. L. Carter, Pioneers, and consisting of five British officers, and 250 men of the Pioneers, one section Mountain Battery, one Indian officer and 29 men of the 3rd Gwalior Lancers (Imperial Service Troops), and one section Field Ambulance, concentrated at Mastung Road on June 5th and marched *via* Kalat into Jhalawan.

In a series of well designed and executed operations during June, July and August in conjunction with the tribal forces, the rebel bands were rounded up, some 45 men being killed and a number captured. Order was completely restored by 11th August and the Kalat Column returned to Mastung Road, reaching that place on 22nd August.

In reporting on the operations, Lieutenant-General Sir M. H. S. Grover, K.C.B., K.C.I.E., Commanding 4th (Quetta) Division, stated that the operations under trying conditions of heat and bad water, etc., were skilfully carried out by Lieutenant-Colonel Carter and reflected great credit on him and all ranks concerned.

#### 7.—OPERATIONS ON THE NORTH-WEST FRONTIER.

Except on the Mohmand border, where the attitude of the tribes necessitated the mobilisation of the Peshawar and a portion of the 2nd Division, and an attack on Sarwekai by the Mahsuds in March, 1917, the activity of troops on the frontier has been confined to dealing with trans-border raids. These, however, especially on the Derajat border, have been almost incessant, and have entailed considerable activity on the troops guarding the frontier.

During the last half of 1916 the attitude of some of the Mohmand tribes became distinctly hostile, and a number of raids were made across the border into the Peshawar area.

To prevent these raids, and as a punishment, a blockade was instituted along the Mohmand border, and a chain of block-houses, connected by a wire fence, was constructed and manned.

On 14th November a Mohmand lashkar estimated at 6,000 concentrated near Hafiz Kor, threatening Shabkadar.

The 1st and 2nd Infantry Brigades of the 1st (Peshawar) Division, under the command of Maj.-Gen. Sir F. Campbell, K.C.B., D.S.O., with a proportion of divisional troops and detachments of Frontier Militia and Constabulary, had meanwhile been concentrated on the blockade line.

Owing to the difficulty of supplies it seemed unlikely that the lashkar could remain long in its present position, and it appeared probable that a night attack would be made on some part of the blockade line, after which the lashkar would disperse without punishment.

Maj.-Gen. Campbell accordingly issued orders for an attack on the morning of the 15th November.

The attack was carried forward into the foothills occupied by the enemy in the vicinity of Hafiz Kor, and casualties estimated at 100 killed and severely wounded were inflicted. At 4 p.m. our force withdrew unopposed. The lashkar had been completely broken up, and on 16th November reconnaissances showed that it had completely disappeared, the tribesmen having dispersed to their homes.

In his report on the action, Maj.-Gen. Campbell drew attention to the effectiveness and efficiency of the armoured car unit, and especially commended the action of the aeroplanes of the Squadron R. F. C. in co-operation with artillery.

Throughout these operations, the Hon. Lt.-Col. Sir George Roos Keppel, G.C.I.E., K.C. S.I., rendered most valuable advice and assistance.

On 2nd March, 1917, a Mahsud gathering of some 2,000 men advanced on the post of Sarwekai in South Waziristan. A part of the Garrison of the post, composed of Militia, under the command of Maj. F. L. Hughes, moved out and engaged the enemy. A skirmish ensued in which several casualties were inflicted on both sides, our losses including Maj. Hughes, killed, while gallantly leading his men, and the Militia withdrew to the post which the enemy surrounded.

The Derajat Movable Column, under the command of Brig.-Gen. G. M. Baldwin, D.S.O., moved forward by the Gomul route and Khajuri Kach and relieved Sarwekai on 9th March, the enemy withdrawing to the vicinity of Barwand. The enemy encampments at Barwand were burnt and the tribesmen dispersed.

The movable column was then withdrawn to Khajuri Kach and later to Tank.

The 44th Brigade of 16th Division under the command of Brig.-Gen. G. D. Crocker was concentrated at Jatta in support of the Derajat Movable Column on 12th March, and withdrew, prior to dispersal to its summer stations, on 4th April.

#### 8.—PROTECTION OF INDIAN COASTS.

Measures have been taken for the due protection of Indian coasts and defended ports. This has involved constant labour and vigilance on the part of defended port commanders, their staffs and troops.

I am much indebted in this connection to the valuable advice and assistance which have always been readily afforded to me by the Naval Commanders-in-Chief, East Indies and China stations.

9. Throughout the period dealt with in the dispatch I have always received the fullest help from all Departments of the Government of India.

Their assistance since the commencement of the war forms the subject of a separate dispatch, in which I shall also deal with the work of the Army in India and of civilian official and others in connection with the war.

10. In conclusion, I attach a list of officers and men whose names I desire to bring to notice for gallantry or good service in connection with operations dealt with above.

I have the honour to be, Sir,

Your obedient servant,

C. C. MONRO, General,

Commander-in-Chief in India.

Names of officers and men brought to notice for gallantry or good service in the operations dealt with in this despatch:—

**APPOINTMENT OF A COMMITTEE TO INVESTIGATE AND REPORT ON THE  
REVOLUTIONARY MOVEMENT IN INDIA.**

**RESOLUTION.**

THE Governor-General in Council has, with the approval of the Secretary of State for India, decided to appoint a Committee :—

- (1) To investigate and report on the nature and extent of the criminal conspiracies connected with the revolutionary movement in India.
- (2) To examine and consider the difficulties that have arisen in dealing with such conspiracies and to advise as to the legislation, if any, necessary to enable Government to deal effectively with them.

The Government of India consider that for the proper examination of these questions a strong judicial element is essential in the Committee.

They have succeeded in securing the services of Mr. Justice Rowlatt of the King's Bench Division of His Majesty's High Court of Justice as President.

The following have agreed to serve as members :—

The Hon'ble Sir Basil Scott, Kt., Chief Justice of Bombay ;

The Hon'ble Diwan Bahadur C. V. Kumaraswami Sastriyar, Judge of the High Court of Madras ;

The Hon'ble Sir Verney Lovett, K.C.S.I., Member of the Board of Revenue, United Provinces ; and

The Hon'ble Mr. Provash Chandra Mitter, Vakil of the High Court of Calcutta.

Mr. J. D. V. Hodge, I.C.S., Bengal, has been appointed Secretary to the Committee.

The Committee will assemble in Calcutta early in January 1918. It will sit *in camera*, but will be given full access to all documentary evidence in the possession of Government bearing on the existence and extent of revolutionary conspiracies in India and will supplement this with such other evidence as it may consider necessary.

ORDERED that the Resolution be published in the *Gazette of India*.

This victory will be gained only if we steadfastly remember the responsibility resting upon us and in a spirit of reverent obedience ask the blessing of Almighty God upon our endeavours. Let us seek to be enlightened in our understanding and fortified in courage in facing the sacrifices we may yet have to make. I therefore appoint

*The 17th December 1917.*

**No. 910-C.**—The following Royal Warrant is published for general information :—

GEORGE R. I.

GEORGE THE FIFTH, by the Grace of God, of the United Kingdom of Great Britain and Ireland and of the British Dominions beyond the Seas, King, Defender of the Faith, Emperor of India, to all to whom these Presents shall come, Greeting !

WHEREAS Her late Majesty Queen Victoria, being desirous of distinguishing by some mark of Her Royal Favour the many heroic acts performed by Mariners and others who endanger their own lives in saving or endeavouring to save the lives of others from shipwrecks and other perils of the sea ; and the many heroic acts performed on land by those who endanger their own lives in saving or endeavouring to save the lives of others from accidents in mines, on railways and at fires, or other perils within Her Dominions, other than perils of the sea, did, by Warrants under the Royal Sign Manual bearing date respectively the 7th March, 1866, the 12th April, 1867, and the 30th April, 1877, for Herself, Her Heirs and Successors, institute and create as a mark of Royal Approbation of such heroic acts, new Decorations styled respectively "The Albert Medal of the First Class" and "The Albert Medal of the Second Class," which Decorations Her Majesty was desirous should be highly prized and eagerly sought after :

And whereas the said Warrants were subsequently amended and all the Warrants relating to these Decorations were consolidated by a Warrant under the Sign Manual bearing date the 5th June, 1905 :

And whereas it is Our Pleasure to amend the style of the said Decorations :

We are graciously pleased to make, ordain and establish the following Rules and Ordinances for the government of the Decorations :—

I. It is ordained that the Decoration in each case shall be styled "The Albert Medal" ; but when it is awarded for acts of such extreme and heroic daring as to merit a special degree of recognition, it shall be styled "The Albert Medal in Gold."

II. It is ordained that the Albert Medal shall consist of a bronze oval-shaped Badge or Decoration, having in the centre a Monogram composed of the letters V. and A. erect upon an enamelled background, surrounded by a Garter inscribed in raised letters "For Gallantry in Saving Life at Sea," or "For Gallantry in Saving Life on Land," as the case may be, and surmounted by a representation of the Crown of His Royal Highness the lamented Prince Consort ; but where the Medal conferred is "The Albert Medal in Gold," it shall consist of a gold oval-shaped Badge or Decoration having in the centre a Monogram composed of the letters V. and A. erect in gold upon an enamelled background, surrounded by a Garter in bronze inscribed in raised letters of gold, "For Gallantry in Saving Life at Sea," or "For Gallantry in Saving Life on Land," as the case may be, and surmounted by a representation in gold of the Crown of His Royal Highness the lamented Prince Consort. When the Medal is given for gallantry in saving life at sea, the letters V. and A. shall be interlaced with an anchor erect in bronze or gold, as the case may be.

The Medal shall be suspended from a riband of an inch and three-eighths in width, having two white longitudinal stripes ; in the case of the "Albert Medal in Gold" the riband shall have four white longitudinal stripes.

The colour of the enamel and riband shall be dark blue when the Medal is conferred for gallantry in saving life at sea, and crimson when it is conferred for gallantry in saving life on land.

III. It is ordained that the Medal shall only be awarded to those of Our faithful subjects who, in saving or endeavouring to save the lives of others from perils of the sea, or from perils on land, have endangered their own lives, and that such award shall be made only on a recommendation to Us by Our Principal Secretary of State for the Home Department.

Provided always that where the Medal is conferred for gallantry in saving life at sea, the preliminary steps and enquiry shall, if the award be to anyone belonging to the Royal Navy or the Royal Marines, be with the Lords Commissioners of the Admiralty, and in other cases with the President of the Board of Trade.

IV. It is ordained that the names of those persons upon whom We may be pleased to confer the Medal shall be published in the *London Gazette*. Where the Medal is conferred for gallantry in saving life on land a Register of such names shall be kept in the Office of Our Principal Secretary of State for the Home Department. Where the Medal is conferred for gallantry in saving life at sea, a Register of the names of such of these persons as belong to the Royal Navy or the Royal Marines shall be kept in the Office of the Lords Commissioners of the Admiralty, and a Register of the names of such of these persons as do not belong to the Royal Navy or the Royal Marines shall be kept in the Office of the Board of Trade.

V. It is ordained that the Medal shall be worn suspended from the left breast.

VI. It is ordained that any act of gallantry which is worthy of recognition by the award of the Albert Medal, but is performed by one upon whom the Decoration has already been conferred, may, on a recommendation to Us by Our Principal Secretary of State for the Home Department, be recorded by a bar attached to the riband by which the Medal is suspended; and for every such additional act an additional bar may be added.

VII. In order to make such additional provision as shall effectually preserve pure these most honourable Decorations, it is ordained that if any person on whom any of such Decorations is conferred be guilty of any crime or disgraceful conduct which in Our judgment disqualifies him for the same, his name shall, by an especial Warrant under Our Royal Sign Manual, be forthwith erased from the Register of those upon whom the said Decoration shall have been conferred, and his Medal shall be forfeited. And every person to whom the said Medal is given shall before receiving the same enter into an engagement to return the same if his name shall be so erased as aforesaid under this Regulation. ### RESOLUTION.

**No. 2228.**—In Military Department Notification No. 718, dated the 17th July 1908, the approval of the Government of India was accorded to the adoption of the system detailed below for the promulgation of Government and other orders to the Army in India :—

- (1) The system of publishing orders to the Army in G. G. Os., G. Os. C. C., or India Army Circulars to be discontinued.
- (2) All orders or notifications to the Army to appear either in the *Gazette of India*, or in orders published by the Adjutant-General's Department styled "India Army Orders."
- (3) All such commissions, appointments, promotions, retirements, rewards, legal notifications, despatches connected with field operations, or other notifications to be published in the *Gazette of India* which it is usual or expedient to publish therein.
- (4) Changes in organisation, etc., and rewards of a minor description, such as the grant of meritorious service medals, to be notified only in India Army Orders, as a rule.
- (5) India Army Orders to commence with the notification of all Royal Warrants and Regulations or orders promulgated under the authority of the Secretary of State for India, or the Governor-General in Council, and to be prefaced accordingly. Such notifications to be followed by orders which had hitherto appeared only in G. O. C. C.
- (6) A quarterly appendix to the India Army Orders to be published in the place of India Army Circulars, to contain only corrections to the India Army Regulations, and to be printed separately so as to facilitate the correction of books of regulations.

2. The Government of India have had under consideration a proposal to modify the system under which the decisions of Government and the orders of His Excellency the Commander-in-Chief are communicated through the medium of Army Department letters and India Army Orders, respectively. Under the existing system, Army Department letters are generally addressed to the administrative Branch of Army Headquarters to which the subject-matter pertains, or to the General Officer Commanding Division or Independent Brigade, or Controller of Military Accounts concerned. They seldom reach the smaller formations and staffs without great delay and duplication of work and many never reach units at all. India Army Orders frequently contain much matter which is not proper to them.

3: In modification of the orders contained in the notification quoted in paragraph 1 above, the Government of India have decided that the procedure detailed below shall be adopted, with effect from the 1st January 1918, for the promulgation of decisions of Government and orders of His Excellency the Commander-in-Chief to the Army in India :—

(a) *Army Department letters* conveying the sanction of the Government of India to proposals emanating from Army Headquarters or elsewhere will in future be restricted to cases of individual or of special application, and will not convey decisions which will form precedents for the Army as a whole. They will also deal with confidential matters, even of general importance, which cannot properly be published in India Army Orders.

(b) Decisions not within the powers of His Excellency the Commander-in-Chief in India and which convey the orders of the Right Hon'ble the Secretary of State for India or the Governor-General in Council on matters affecting the Army as a whole will in future be issued simultaneously to all authorities in a form analogous to the British Army Council Instructions. The form of communication will be designated "Army Instructions (India)."

(c) The Army Instructions (India) will be printed over the signature of the Secretary to the Government of India, Army Department, and will appear on separate sheets numbered consecutively. They will be issued regularly once a week to all authorities, civil and military, from the Government Press: the distribution list corresponding approximately to that of India Army Orders.

A bound copy of these instructions will be issued monthly with an index.

(d) India Army Orders will in future be restricted to the promulgation of orders in which His Excellency the Commander-in-Chief in India is the deciding authority and to the republication of such War Office Army Orders as are deemed applicable to the Army in India.

ORDER.—Ordered that a copy of this Resolution be published under a notification in Part I of the *Gazette of India*, ordered also that it should be communicated to the several Departments of the Government of India; the Financial Adviser, Military Finance; all local Governments and Administrations; Heads of Branches of Army Headquarters; the Director, Royal Indian Marine; and all Controllers of Military Accounts.

**ANNUAL RETURNS SHOWING THE MORTALITY FROM WILD ANIMALS AND VENOMOUS SNAKES.**

**R E S O L U T I O N .**

THE annual returns showing the mortality from wild animals and venomous snakes have been received from the local Governments and Administrations.

The total number of persons killed by wild animals in British India during the year 1916, was 2,278 or 2 more than in 1915. As usual, the highest mortality was in Bihar and Orissa, where 847 deaths occurred, including 530 caused by tigers as compared with 376 in the preceding year. As many as 488 persons were killed by tigers in the districts of Angul, Singhbhum, Manbhum, Hazaribagh, Cuttack, Sambalpur, Ranchi and Palamau. The local authorities are taking or have in contemplation vigorous measures to reduce the loss of life in those tracts. In all 1,118 human lives were destroyed by tigers in British India; the variations under this head in provinces other than Bihar and Orissa do not call for any remarks except in the case of the Madras Presidency where casualties from tigers decreased by 125 in 1916. The number of deaths caused by elephants, leopards, bears, wolves and hyenas calls for no comment. Under the head of "unclassified animals," pigs and crocodiles or alligators were responsible for 178 and 228 deaths respectively.

2. The total mortality due to snakebite among human beings fell from 26,406 in 1915 to 23,640 in 1916. The decrease is shared by nearly all the provinces; as usual the United Provinces, Bihar and Orissa and Bengal were the provinces which suffered most, with 6,712, 5,970 and 4,114 deaths respectively.

3. During 1916, 20,574 wild animals were destroyed, among which were 1,399 tigers, 6,019 leopards, 2,715 bears and 2,579 wolves. The total amount of rewards paid under this head was Rs. 1,71,974. There was a considerable reduction both in the number of snakes killed and the amount paid as reward for their destruction. No definite pronouncement can as yet be made on the efficacy of treatment by Sir Lauder Brunton's lancets, although these instruments are reported to have effected a number of cures in cases in which they were used.

4. Under the Indian Arms Act, 1878, 20,575 licences were issued in forms XVI, XVII and XVIII in 1916, an increase of 600 over the figure of the previous year. The total number of licenses in force was 137,183 as compared with 167,242 in 1915.

**ORDER:—**Ordered that a copy of this Resolution, (and annexure) be forwarded to local Governments and Administrations\* and that it be published in the supplement to the *Gazette of India* for general information; also that a copy be forwarded to the Director of Statistics.

\* Including the Chief Commissioners of the North-West Frontier Province and Ajmer-Merwara and the Resident in Mysore.

S. R. HIGNELL,

*Offg. Secretary to the Government of India.*

**TARIFF VALUATION OF SUGAR.**

The following statement shows in respect of each of the descriptions of sugar distinguished in the Tariff Schedule II (excepting molasses and all other kinds of sugar), *first*, the total imports into India in the month of November 1917, and the average value per cwt. as calculated on the returns received from the Customs Houses; and, *secondly*, a running total showing the total imports into India since the beginning of the year (1st October to 30th September) and the average net value per cwt. so far established. It is published in conformity with the procedure laid down in Customs Circular No. V of 1911, in order to enable merchants to compute the probable rate of duty for the year 1919 :—

## DEPARTMENT OF STATISTICS, INDIA

CALCUTTA, DECEMBER 18, 1917.

## Third COTTON Forecast, 1917-18.

This forecast is based on reports furnished by provinces, which comprise the entire cotton area of India. It deals with reports on both the early and late varieties of cotton up to the beginning of December, 1917. A fourth and final report will, as usual, be published in the third week of February, 1918.

The total area this year amounts to 23,768,000 acres as against 20,702,000 acres on this date last year, or an increase of 15 per cent. As compared with the final estimate of last year (21,212,000 acres), the present estimate shows an increase of 12 per cent.

The total estimated yield is 3,938,000 bales of 400 lbs each, as against 4,384,000 bales (the revised figure) on this date last year, or a decrease of 10 per cent. The present estimate of outturn, as compared with the sum of actual exports (net) abroad, mill consumption, and estimated extra-factory consumption in 1916-17 (4,628,000\* bales), shows a decrease of 15 per cent.

The present figures for the provinces are as follows (the figures for previous years are given on page 5) :—

Provinces and States	Acres	Bales of 400 lbs	Yield per acre lbs
Bombay (including Native States)	6,670,000	1,241,000	74
Central Provinces and Berar	4,564,000	591,000	52
Madras (including Native States)	2,524,000	498,000	79
Punjab (including Native States)	1,740,000	281,000	65
United Provinces (including Native States)	1,316,000	198,000	60
Sind (including Native States)	220,000	78,000	142
Burma	236,000	35,000	59
Rihar and Orissa	67,000	16,000	95
Bengal (including Native States)	71,000	20,000	113
North-West Frontier Province	38,000	10,000	105
Assam	32,000	12,000	150
Ajmer-Merwara	47,000	13,000	111
Hyderabad	3,445,000	450,000	52
Central India	1,894,000	174,000	50
Baroda	827,000	218,000	105
Rajputana	427,000	85,000	80
Mysore	150,000	18,000	48
<b>Total</b>	<b>23,768,000</b>	<b>3,938,000</b>	<b>66</b>

On the basis of these figures, the average outturn per acre of the present crop for all India is 66 lbs as against 85 lbs last year. The area increased almost everywhere, owing to the stimulus of high prices and to favourable weather conditions at sowing time. The crop was, however, seriously affected by the heavy and continuous rain of September and October, except in Madras, Sind, the North-West Frontier Province, Assam, and the States of Baroda and Mysore.

A statement showing the present estimates of area and yield according to the recognised trade descriptions of cotton is given below :—

The provincial reports are summarised below :—

**Bombay** (26·2 per cent of the total area under cotton in India).—The total area under both early and late cotton is estimated up to 1st December at 6,670,000 acres (including 3,146,000 acres in the Native States, but excluding 827,000 acres in Baroda), which is 21 per cent above the area reported at this date last year. The yield is at present estimated at 1,241,000 bales (including 583,000 bales in the Native States, but excluding 218,000 bales in Baroda), which is 8 per cent short of the estimate made at this date last year. In Gujarat the crop at first did well, but heavy and continuous rains in August and September stunted the growth of the plants, particularly on heavy soils, and further rain in October rotted them in low-lying fields. Some damage from insects has been reported from Kathiawar. The crop in Gujarat has begun to improve with the cold weather, and if present conditions continue favourable, a fair outturn may be expected.

\* Net exports abroad from September 1916 to August 1917, were 2,083,000 bales, the mill consumption 1,795,000 bales, and the estimated extra-factory consumption 750,000 bales as accepted by the Bombay Cotton Trade Association

(a) Includes Hyderabad. A revised classification of Hyderabad cotton is under consideration

(b) Revised figure

(c) Includes Punjab-American cotton grown in the Punjab

The late crop, which is now in flower, will be ready by the end of February. The Deccan crop also did well at the beginning, but excessive rain in September caused some shedding of bolls and leaves in Khandesh, and the abnormally heavy rains of October and November further injured the crops, causing in many places the dropping of ripe bolls. The outturn is fair in East Khandesh and Nasik and in part of Nagar, but poor elsewhere. The Karnatak crop was sown somewhat late, but the weather has since been fairly satisfactory, and the young plants are doing well, except the early varieties which suffered a little on account of rain in November. The crop will be ready for picking in March. The area and outturn of cotton by trade descriptions in the Bombay Presidency (including Baroda but excluding Sind) are :—

**Central Provinces and Berar** (20·4 per cent of the total area under cotton in India).—The total area sown is reported to be 4,564,000 acres (8,214,000 acres being in Berar), which is 4 per cent above the area reported at this date last year. The yield is estimated at 591,000 bales (428,000 bales being in Berar), which shows a decrease of 21 per cent as compared with the revised estimate (753,000 bales) of last year. The weather conditions have been on the whole unfavourable for the crop. Heavy rain in September, which continued up to about the middle of October, caused appreciable damage to the standing crop in the Nagpur country and Berar—the chief cotton tracts, and a considerable area had thus to be ploughed up and sown with rabi crops. The condition of the crop is poor, and although there are still some flowers on the plants, they are not likely to mature without a few cold weather showers.

**Madras** (10·9 per cent of the total area under cotton in India).—The total area sown is at present estimated at 2,524,000 acres (22,000 acres being in the Banganapalle State), which is 19 per cent above the area at the corresponding date of last year. The total yield is now estimated at 498,000 bales (3,000 bales being in the Native State), which is 41 per cent above the estimate at this date last year. The crop has been sown early, especially in the north, and this accounts for most of the increase over the area reported last year. At the same time, the high price of cotton and low prices of groundnut and indigo have led to a real increase in acreage in the "North-erns and Westerns" area; while in the south the area under "Cambodia" is increasing steadily. The season has been marked by heavy and continuous rains in the north, after a comparative dry July, and by early sowing rains in the south. It has so far been generally favourable, especially in the "North-erns" and "Westerns" area, which is expected, on the whole, to yield a good outturn. The area and outturn of cotton according to trade descriptions are as follows :—

	Acres.	Bales.
Tinnevelly . . . . .	614,000	130,000
Salems . . . . .	277,000	40,000
Cambodias . . . . .	231,400	117,000
Northern and Westerns . . . . .	1,112,000	159,000
Coomadas . . . . .	270,000	50,000
Others . . . . .	20,000	2,000

**Punjab** (7·2 per cent of the total area under cotton in India).—The total area sown is reported to be 1,740,000 acres (156,000 acres being in the

Native States), which is 48 per cent above the area reported at the corresponding date of last year. Notwithstanding the increase in area, the outturn is less than that of last year. The total yield is estimated at 281,000 bales (including 37,000 bales in the Native States), showing a fall of 13 per cent as compared with the estimate made at this date last year. The season was not favourable. The abnormally heavy rains and floods after the middle of August destroyed the early flowers and considerably damaged the standing crop with the result that the outturn has been generally below normal. The Rawalpindi and the Multan divisions, however, did not suffer so much as did the rest of the province. The American cotton, which is now grown extensively in the canal colonies, fared better than the ordinary country cotton. The area under American cotton exceeds 250,000 acres.

**United Provinces** (5·5 per cent of the total area under cotton in India).—The total area sown is reported to be 1,316,000 acres (10,000 acres being in the Rampur State), which is 11 per cent above the area reported at this date last year. The yield is estimated at 198,000 bales (including 2,000 bales in the Native State), which is 36 per cent below last year's yield. The Director of Land Records and Agriculture is, however, of opinion that the returns of baling presses go to show that even this estimate, which is the lowest since 1909-14, may be unduly high. Towards the end of September the rain in the upper and middle Doab was of exceptional severity, and much of the crop was ruined and the fields ploughed up for the rabi crops. In Bundelkhand the crop was stunted by continuous rainfall and yielded very little. In the lower Doab and Rohilkhand the damage was less extensive and the outturn somewhat better.

**Sind** (1·3 per cent of the total area under cotton in India).—The total area is reported to be 220,000 acres (3,000 acres being in the Khairpur State), which is 5 per cent below the area reported at this date last year. The decline in area is attributed to deficient water supply at sowing time. The yield is estimated at 78,000 bales\* (including 1,000 bales in Khairpur), being 5 per cent above last year's yield. The water supply was favourable after sowing, but heavy rains in September caused a considerable number of bolls to drop and boll-worms further damaged the crop. Subsequent weather conditions have been favourable, and the condition of the crop is now reported to be fair.

**Burma** (1 per cent of the total area under cotton in India).—The total area sown is reported to be 236,000 acres, which is 9 per cent above the area at the corresponding date of last year. The yield is estimated at 35,000 bales, being 20 per cent short of that reported at the corresponding date of last year. Untimely rain in September and October affected the crop, especially in the Sagaing District.

**Bihar and Orissa** (0·4 per cent of the total area under cotton in India).—The total area and yield of both the early and late varieties of cotton are estimated at 67,000 acres and 16,000 bales respectively, being the same as reported at this date last year. For the early crop, weather conditions were favourable till September, but the excessive rainfall towards the end of October did some damage to the crop in parts of the Santhal Parganas, Azilul, Sambalpur, and Manbhum. Prospects of the crop are on the whole fair. For the late crop weather conditions were on the whole favourable, and its condition is reported to be generally good. Some damage was, however, done by floods in parts of South Bihar. Sowings of the crop have not yet begun in Cuttack.

\* The trade estimates of Sind cotton this season are approximately 772,000 bales and 100,000 bales.

**Bengal (3 per cent of the total area under cotton in India).—**The total area is estimated at 71,000 acres, being 3 per cent short of last year's area at this date. The yield is estimated at 20,000 bales, which is 5 per cent below the corresponding estimate of last year. The crop is reported as generally unsatisfactory in the Chittagong Hill Tracts, Hill Tippera, and Midnapur, owing to excessive rainfall, and as fair in Bankura and Maimensingh. The area and outturn of cotton according to trade descriptions are :—

	Acres	Bales
Bengal-Sind . . . .	4,000	1,000
Comillas . . . . .	67,000	19,000

**North-West Frontier Province (0.2 per cent of the total area under cotton in India).—**The total area is reported to be 38,000 acres, which shows an increase of 36 per cent as compared with the area reported at the corresponding date of last year. The estimated yield is 10,000 bales, as compared with 6,000 bales reported at this date last year. The outturn was average on both the irrigated and unirrigated lands of Peshawar, Kohat, and Bannu, and generally below average elsewhere.

**Assam (0.2 per cent of the total area under cotton in India).—**The area sown is estimated at 32,000 acres, which is the same as that reported at the corresponding date of last year, but the estimated yield (12,000 bales) is 9 per cent above that of last year. The character of the weather was, on the whole, favourable, and a normal outturn is expected except in Sylhet and Nowgong.

**Ajmer-Merwara (0.2 per cent of the total area under cotton in India).—**The area sown is estimated at 47,000 acres, being the same as at this date last year. The yield is estimated at 13,000 bales, as compared with 20,000 bales estimated at this time last year.

**Hyderabad (14.7 per cent of the total area under cotton in India).—**The total area is now reported to be 3,445,000 acres, which is 8 per cent above the area reported at the corresponding date of last year. The yield is estimated at 450,000 bales, as against 500,000 bales estimated at this date last year. The detailed district figures of area are as follows :—

**Central India (6 per cent of the total area under cotton in India).—**The total yield is estimated at 174,000 bales on an area of 1,394,000 acres. These figures indicate a decrease of 38 per cent in yield but

an increase of 10 per cent in area, as compared with the estimates made at this date last year. The detailed figures of area are as follows :—

The crop is reported to have been damaged by excessive rain in Gwalior and Indore.

**Baroda (3.2 per cent of the total area under cotton in India) reports 827,000 acres under cotton as compared with 706,000 acres at this date last year. The yield is estimated at 218,000 bales, which is 29 per cent above the estimate at this date last year.**

**Rajputana (1.6 per cent of the total area under cotton in India).—**The total area and yield are at present estimated at 427,000 acres and 85,000 bales, as against 334,000 acres and 133,000 bales estimated at this date last year. The crop is reported to have been damaged by heavy and continuous rain in Marwar, Southern and Eastern States, Kotah, and Jhalawar. The detailed figures of area for the States are as follows :—

**Chart.**—The chart below shows the present estimates of area and yield for all India as compared with the final figures of the preceding nine years.

The curve for area represents millions of acres and that for yield millions of bales.

**Cotton crop in foreign countries.**—The latest information published by the International Institute of Agriculture, Rome, regarding the cotton crop of 1917 in foreign countries may be summarised as follows:—In the United States of America the area sown is 34,586,000 acres and the approximate estimate of yield about 15,027,000 bales of 400 lbs. (or 12,022,000 bales of 500 lbs. each), as compared with 35,224,000 acres and 14,516,000 bales of 400 lbs. (=11,613,000 bales of 500 lbs.) in the previous year. In Egypt the area sown is 1,740,000 acres, as against 1,718,000 acres last year.

It appears from the Monthly Bulletin of the Ministry of Agriculture, Cairo, for September 1917, that in Egypt unfavourable weather prevailed in the

province of Beheira throughout the month; elsewhere it was on the whole favourable, although low temperature and humidity, especially at night, were reported from most provinces towards the middle and latter parts of the month, checking the opening of the late bolls. Water supply was ample. The first picking in Upper Egypt is reported as satisfactory. In Lower Egypt it is making rapid progress and the results obtained so far are good except in certain places. The prospects of the second picking are almost everywhere far from good and the final result of the crop is not expected to turn out quite favourably as was hoped last month. The outturn is estimated at 96 per cent of the average in Upper Egypt and 99 per cent in Lower Egypt.

## DEPARTMENT OF STATISTICS, INDIA.

## TRADE FLUCTUATIONS IN SELECTED ARTICLES IN OCTOBER, 1917.

The object of the tables appended is to show the quantities of the principal staples of agricultural produce imported from the various provinces, etc., and from foreign countries into the ports of Calcutta, Bombay, and Karachi, and into the Madras ports during the month of October, 1917, and for the seven months, April to October, 1917, as compared with the corresponding periods of 1916. The statistics include foreign sea-borne and coasting trade as well as inland (rail and river-borne) trade. They have been furnished by Collectors of Customs, Steamer Companies, Railway Audit Officers, the Commissioners for the Port of Calcutta, etc.

## TRADE FLUCTUATIONS IN OCTOBER, 1916 AND 1917.

It will be seen from Table I, that the imports by rail, river, and sea in October, 1917, as against the corresponding month of 1916, show (in round numbers) a decrease of—

68 per cent in linseed.

(7,300 tons as against 22,400 tons last year.)

52 per cent in raw cotton.

(51,100 bales as against 106,600 bales last year.)

36 per cent in jute.

(788,100 bales as against 1,154,400 bales last year.)

36 per cent in tea.

(34,384,900 lbs as against 58,490,900 lbs last year.)

26 per cent in rice (including paddy).

(76,500 tons as against 104,100 tons last year.)

The imports of gram and pulse by rail, river, and sea into ports show an increase of 102 per cent (58,100 tons as against 28,800 tons last year), due mainly to larger exports from the Punjab and the United Provinces of Agra and Oudh. The increase of 22 per cent (7,500 tons as against 6,200 tons last year) in the imports, of rape and mustard seed is accounted for by an increase in exports mainly from the Punjab,

It will be seen from Table IV (wheat, excluding wheat flour) that the principal source of the imports in October, 1916, was the Punjab. During the corresponding month of 1917, the Punjab sent by far the largest quantity, namely, 44 per cent of the total.

NOTE.—One bale of cotton or jute is equivalent to 480 lbs.

One mowad is equivalent to 22½ lbs.

One mowad of paddy is taken as equivalent to 25 mowad of rice.

**GENERAL RESULTS—SEVEN MONTHS' IMPORTS INTO THE PORTS FROM UP COUNTRY, ETC., THIS YEAR AND LAST YEAR.**

The seven months' figures in table I show (in round numbers) a decrease of—

61 per cent in linseed

(108,700 tons as against 281,400 tons last year.)

30 per cent in rape and mustard seed.

(82,000 tons as against 117,700 tons last year.)

26 per cent in jute

(2,208,600 bales as against 2,965,300 bales last year.)

13 per cent in tea

(148,695,700 lbs. as against 171,269,100 lbs. last year.)

12 per cent in rice (including paddy)

(536,700 tons as against 610,000 tons last year.)

The imports of gram and pulse by rail, river, and sea into ports show an increase of 9½ per cent. (426,100 tons as against 240,800 tons last year) mainly on account of larger exports from the Punjab and the United Provinces. The increase of 8½ per cent (1,515,400 tons as against 824,000 tons last year) in wheat (excluding wheat flour) is accounted for by larger exports chiefly from the Punjab and the United Provinces. The imports of raw cotton show a rise of 54 per cent. (1,855,300 bales as against 1,204,100 bales last year) owing to larger exports principally from Bombay.

**TRADE FLUCTUATIONS IN OCTOBER, 1917, AS COMPARED WITH THE PREVIOUS MONTH.**

As compared with September 1917, the imports in October 1917 into the ports referred to above show (in round numbers) an increase of—

56 per cent in jute

(733,100 bales as against 468,500 bales previous month.)

24 per cent in gram and pulse

(58,100 tons as against 46,800 tons previous month.)

13 per cent in tea

(84,384,900 lbs. as against 80,378,600 lbs. previous month.)

2 per cent in rice (including paddy)

(76,500 tons as against 75,800 tons previous month.)

and a decrease of—

26 per cent in wheat (excluding wheat flour)

(91,600 tons as against 124,500 tons previous month.)

7 per cent in raw cotton

(51,100 bales as against 55,200 bales previous month.)

7 per cent in rape and mustard seed

(7,500 tons as against 8,100 tons previous month.)

per cent in linseed

(7,300 tons as against 7,700 tons previous month.)

The statistics for October, 1916 and 1917, as also for the seven months ending October, 1916 and 1917, together with those for September and October, 1917, are summarised below :—

NOTE.—Compared with the preceding fortnight the rise in the price of Arhar Dal in the Punjab, of jawar in Delhi and Sind, of wheat in the Bombay Presidency and of barley and maize in Bihar and Orissa is noticeable. The price of salt advanced in almost all the provinces, the greatest rise being in the Punjab (100 per cent) and the United Provinces (100 per cent). The fall in the price of rice and raw sugar (gur) in Bengal and Assam is also noticeable.

**Wholesale Prices (per maund of 82½ lbs.) of wheat, rice (common), jawar, bajra, and gram at certain selected markets during the fortnight ending 30th November of the years 1917, 1918, and 1915.**

# FOREIGN SEA-BORNE TRADE.

## PREFATORY NOTE.

The returns of Indian imports and exports of merchandise (exclusive of treasure and Government stores) by sea during the six months of the present financial year show a trade balance (excluding treasure) in favour of India of over R38 crores or 10·1 per cent above that of the corresponding period of the previous year. Last year the balance in favour of India in the first half year was nearly R35 crores. The total exports in the six months amounted to R107 crores, of which nearly R59 crores went to ports within the British Empire, and R48 crores to ports outside the Empire. The United Kingdom took 24·8 per cent of exports, followed by Japan 15·3 per cent, the United States 11·2 per cent, and France 4·8 per cent. Italy took 2·6 per cent and Egypt 13·7 per cent, but a considerable portion of the shipments to Egypt was transit trade, the exports being consigned to Port Said for orders. During the half year there were imported into India goods of the value of nearly R69 crores. Of this amount over R46 crores were sent from ports within the Empire, R40 crores alone coming from British ports. The principal exporter to India, apart from the United Kingdom, was Japan which exported goods to the value of over R7 crores. The United States were the third largest exporter and Java the fourth.

The following figures showing India's trade with the British Empire and Allies and the Neutral countries during the six months of the three official years 1915-16, 1916-17, and 1917-18 are interesting :—

COTTON PRESS RETURN.

No. 4 OF 1917-18.

-----  
PREFATORY NOTE.

THE <sup>CO</sup>COTTON SEASON 1917-18.

In the Cotton Forecast published on the 18th December, 1917, the yield of the crop is estimated at 3,938,000 bales on an area of 23,768,000 acres, as compared with 4,628,000 \* bales on an area of 21,212,000 acres, the final figures of last year. There is a decrease of 15 per cent in outturn. It will be seen from the press return below that the cotton is coming in much slower than last year. There were 57,800 bales of cotton pressed in the pressing factories, and 42,600 bales received in the spinning mills, from 1st September to 31st October, 1917, as against 112,700 bales and 55,500 bales, respectively, during the corresponding period of last year. The figures for Native States are, as will be seen from the footnotes to the tables, incomplete and have been omitted.

---

\* This figure represents the sum of net exports and consumption. Net exports abroad from September 1916 to August 1917 were 2,083,000 bales, the mill consumption 1,795,000 bales, and the estimated extra-factory consumption 750,000 bales as accepted by the Bombay Cotton Trade Association.

## FOREIGN SEA-BORNE TRADE DURING NOVEMBER, 1917.

REVIEW of the SEA-BORNE TRADE and NAVIGATION of BRITISH INDIA for the month of NOVEMBER, 1917, and for the eight months ended November, 1917.

## FOREIGN COMMERCE.

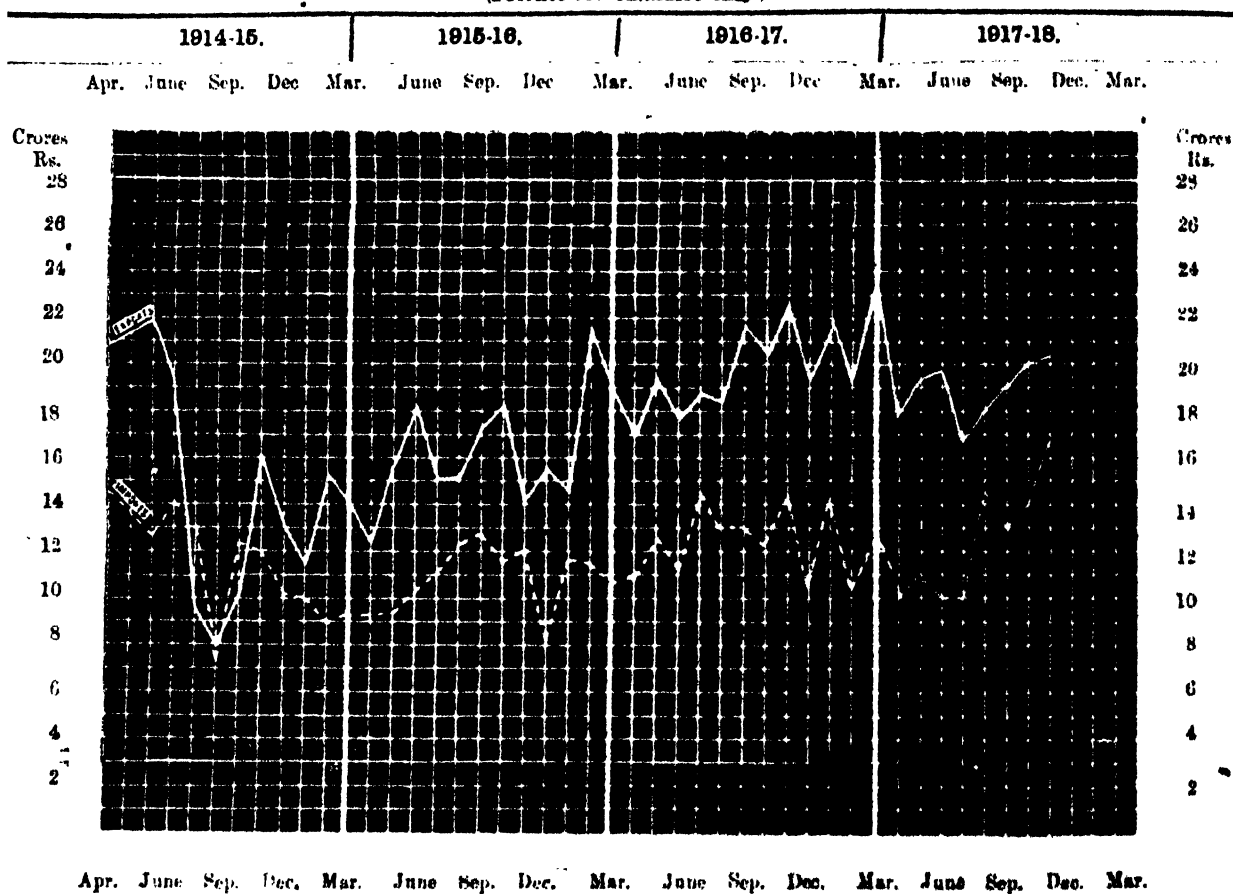

### FOREIGN SEA-BORNE TRADE DURING NOVEMBER, 1917.

The trade returns of British India for November, 1917, as compared with those of the preceding month, showed a great leap upwards in the value of the imports which were valued at nearly R17 crores as against R14 crores in the preceding month. The value of the total exports and re-exports also increased, the exports, including those of wheat, tanned cow hides, and other articles of national importance on Government account, being valued at nearly R20 crores, and the re-exports at nearly R82 lakhs. Imports increased by 20 per cent, exports by 2 per cent, and re-exports by 22 per cent. As compared with November, 1916, imports showed an increase of 17 per cent and re-exports of 21 per cent, while exports showed a decrease of 12 per cent. Another noticeable feature of the returns is the balance of trade which if all items be included shows an adverse balance of trade for the eight months April\* to November 1917.

The chart showing the course of monthly imports and exports, including re-exports, from April, 1914, to November, 1917, is appended below:—

**MONTHLY IMPORTS AND EXPORTS FROM APRIL, 1914, TO NOVEMBER, 1917.**

As the publication of the treasure figures has been temporarily discontinued, it is not possible to give here the net (private) exports from April to November nor the net balance of trade in the same period. It may be of interest to note that the net (private) exports are considerably below those of 1916 and also below those of 1915. A very interesting feature of the eight months' trade is that the balance of trade is

In the eight months ended November, 1915, the amount of Council Bills paid was R9,69 lakhs. As regards enfaced Rupee paper, R8½ lakhs represented the amount of paper enfaced to London, and over R69½ lakhs the amount re-transferred from London, in the eight months, April to November, 1917, while in the corresponding period of 1916, R43½ lakhs represented the amount of paper enfaced to London and about R63½ lakhs the amount re-transferred from London.

## DEPARTMENT OF STATISTICS, INDIA

CALCUTTA, DECEMBER 20, 1917.

## Final General Memorandum on the INDIGO Crop of 1917-18.

This memorandum is based upon reports received from provinces containing practically the whole area under indigo in British India. The figures refer to the crop which is now being marketed.

The total area is estimated at 690,600 acres, which is 10 per cent below the finally revised acreage (770,000 acres) of last year.

The total yield of dye is estimated at 87,800 cwts, as against 95,700 cwts, the finally revised estimate of last year, or a decrease of 8 per cent.

The season has not been altogether favourable. Heavy rainfall and floods adversely affected the crop in Bihar and Orissa, and in parts of the United Provinces. In Sind the crop suffered from low inundation in the beginning of the season.

The figures for the provinces are given below :—

Provinces.	Estimated total yield.		Area.		Average yield per acre.	
	1917-18	1916-17	1917-18	1916-17	1917-18	1916-17

Bihar and Orissa	10,200	10,800	86,700	80,600	13	15
Punjab	15,200	10,000	84,100	80,900	20	19
United Provinces	17,400	14,100	180,300	189,300	10	10

Bengal	500	200	7,000	2,200	8	10
Total	87,800	95,700	690,600	770,000	14	14

The provincial reports are summarised below :—

**Madras** (43·4 per cent of the total area under indigo in British India):—The area sown is reported to be 312,200 acres, which is 32 per cent below the finally revised area of last year. The area under indigo has diminished in all the important areas in the Circars and the Deccan, and has increased slightly in North and South Arcot. The total yield from the area sown is estimated at 42,900 cwts, as against 80,100 cwts last year, or a decrease of 27 per cent. This estimate is based on the assumption that the whole of the green plant is manufactured into dye. It is, however, stated that owing to the practical cessation of export and the consequent dislocation of the market, a large proportion of the crop has certainly been ploughed in as green manure and not manufactured into dye. There are no means of arriving at any satisfactory estimate of what this proportion actually is. The condition of the crop is reported to have been moderate to fair.

**Bihar and Orissa** (31·1 per cent of the total area under indigo in British India):—The area sown is estimated at 86,700 acres which is nearly 8 per cent larger than that of last year. According to the estimates furnished by the Bihar Planters' Association for Saran, Champaran, Muzaffarpur, and Darbhanga, and by the District Officers for the remaining four districts, the crop of the province is estimated at 10,200 cwts (15,300 factory maunds), as against 10,800 cwts (16,300 factory maunds) last year, or a decrease of 6 per cent. The weather conditions were favourable at sowing time and also for the growth of the crop. Owing, however, to unfavourable weather and floods during the manufacturing season the outturn has been disappointing.

**Punjab** (12 per cent of the total area under indigo in British India):—The total area is estimated at 84,100 acres, which is in excess of the actual area of last year by nearly 40 per cent. The total yield is estimated at 15,200 cwts, as against 10,000 cwts last year, or an increase of 52 per cent.

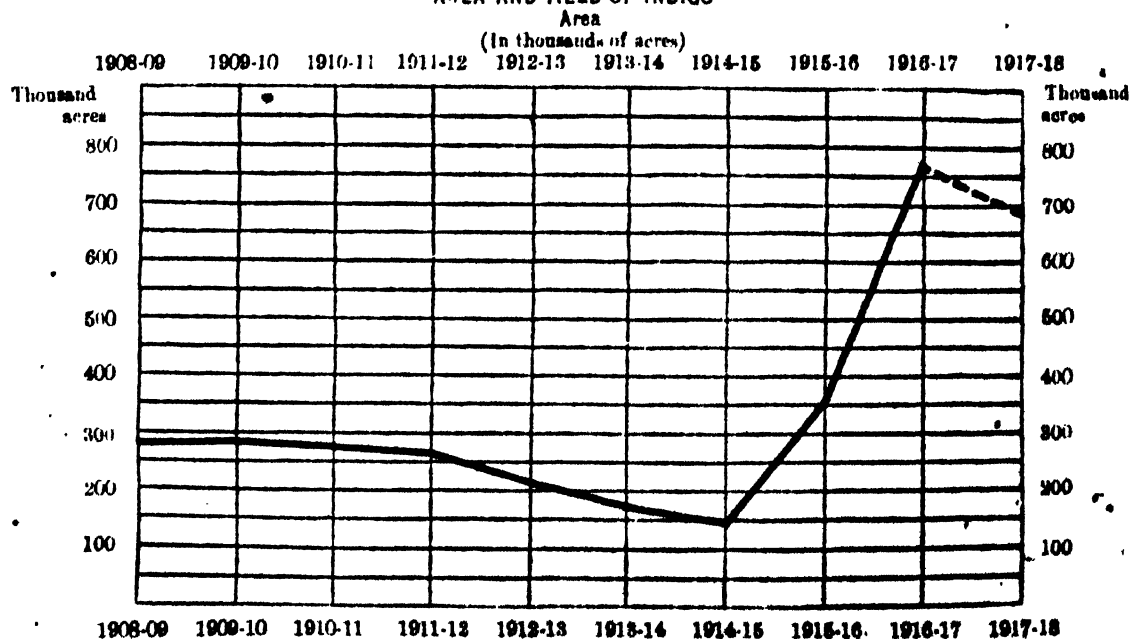

**United Provinces** (11·7 per cent of the total area under indigo in British India):—The area is reported to be 180,300 acres, as against 189,300 acres last year, or an increase of 19 per cent. The total yield is estimated at 17,400 cwts of which a certain proportion is *kutchi* indigo and consumed locally. This is 23 per cent in excess of last year's estimate. The early sown crop on the whole did well, except in the Agra and Muttra districts where it was damaged by excessive rainfall; but the late sown crop was generally indifferent.

**Bombay and Sind** (1·2 per cent of the total area under indigo in British India):—The total area sown is reported to be 10,300 acres (including 7,700 acres in the Khairpur State), which is 30 per cent in excess of the area of last year. The total yield is estimated at 1,600 cwts, as against 1,400 cwts last year, or an increase of 14 per cent. The crop suffered from low inundation in the beginning of the season.

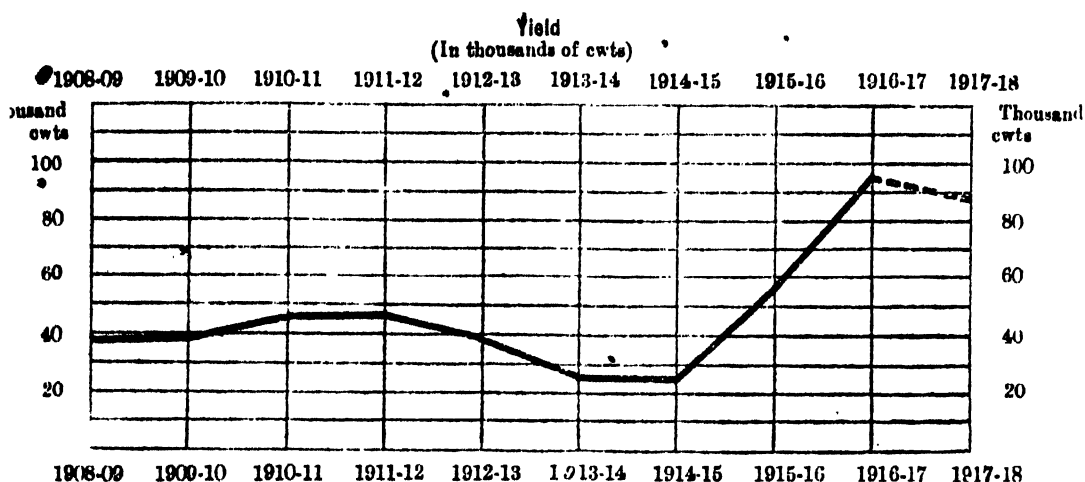

**Bengal** (0·5 per cent of the total area under indigo in British India):—The area and outturn are 7,000 acres and 500 cwts, as compared with 2,200 acres and 200 cwts last year.

**Chart.**—The chart below shows the variations in the present figures of area and yield as compared with the finally revised figures of the last nine years.

## DEPARTMENT OF STATISTICS, INDIA

CALCUTTA, DECEMBER 21, 1917.

## Second RICE Forecast, 1917-18.

This forecast is based on reports received from provinces which contain 99 per cent of the total area under rice in British India. It refers practically to the whole rice crop (early and late) in all the reporting provinces, with the exception of the crop in Coorg and the late (spring) crop of Bombay. These, however, are insignificant, amounting to about 97,000 acres. The reports relate to conditions up to and including the beginning of December.

2. The total area reported amounts to 77,745,000 acres, as against 78,962,000 acres at the corresponding date of last year, or a decrease of 1 per cent. As compared with the revised final figure of last year (80,000,000 acres), the present estimate shows a decrease of 3 per cent. The season has on the whole been favourable, especially for the winter crop, except in parts of Bombay and Sind where heavy rain adversely affected the crop.

3. The following table gives the acreage and estimated outturn as far as available. The table of outturn is incomplete owing to the absence of estimates from Madras and the United Provinces. These latter provinces furnish outturn figures for the final forecasts published in February.

(a) Includes summer, autumn, and winter rice.  
(b) Revised figures.

The provincial reports are summarised below :—

**Bengal (26·6 per cent of the total area under rice in British India).—**(i) The total area sown with autumn (*aus*) rice is reported to be 5,076,000 acres as against 5,048,000 acres last year, or an increase of 0·6 per cent. For the province as a whole, the average outturn for autumn rice is estimated at 88 per cent of the normal, and on this basis the gross yield of cleaned rice works out to 1,641,000 tons, as against 1,372,000 tons last year, or an increase of 20 per cent. The weather conditions were generally favourable in Western Bengal, although some damage was caused to the crop by the rise of rivers in certain districts. In Northern Bengal the rainfall was deficient in the early stages but subsequent rainfall proved favourable on the whole. In Eastern Bengal, although the crop suffered either from unequal distribution of rainfall, floods, or insect pests, the conditions were not altogether unfavourable. Considerable damage was, however, done in Tippera by drought and in Noakhali by floods.

(ii) The area under winter (*aman*) rice is estimated at 15,546,000 acres as against 15,668,000 acres at the corresponding date of last year, or a decrease of only 0·8 per cent. The average outturn per acre for winter rice for the province is at present estimated at 98 per cent of the normal. On this basis the gross yield is estimated at 6,716,000 tons, as against 6,492,000 tons last year, or an increase of 3 per cent. Transplanting operations were greatly hampered owing to deficient rainfall in August and in the first half of September. Subsequently the weather became favourable, although excessive rain accompanied by high wind in the end of October did some injury to the crop. In the Bardwan division a wide area was affected by floods, but the damage was not very serious. After allowing for all adverse conditions, the season may be regarded as a good one.

(iii) An area of 375,000 acres was reported in March last to be under summer (*boro*) rice with an estimated yield of 167,000 tons, as against 405,000 acres and 164,000 tons last year.

**Bihar and Orissa (21 per cent of the total area under rice in British India).—**(i) The total area sown with autumn rice is estimated at 3,795,000 acres, as against 3,745,000 acres, the revised area of last year, or an increase of 1 per cent. A normal (100 per cent) outturn is estimated for the province for autumn rice, and on this basis the total yield is calculated at 1,394,000 tons, as against 1,238,000 tons, the revised estimate of last year, or an increase of 13 per cent. Heavy rain and floods in the early part of August somewhat damaged the crop in Patna, Gya, and Shahabad, and also in parts of Monghyr, Bhagalpur, Hazaribagh, and Palamau. Some damage was also done to the crop in parts of Cuttack and Puri by floods towards the end of the month.

(ii) The area under winter rice is now estimated at 11,733,000 acres, which is 7 per cent below the area of last year. According to the estimates of District Officers, the average outturn for the province works out to 98 per cent of the normal, but the provincial Director remarks that the outturn has been under-estimated in some districts and that the

damage done by rain and floods was on the whole slight, while material benefit was caused by favourable late rains. He is therefore of opinion that the average outturn will not fall short of 110 per cent. On this basis the total yield is estimated at 7,112,000 tons, which is about 7 per cent below the estimate of last year. Heavy rain and floods in the early part of August damaged the seedlings and delayed transplantation in parts of South Bihar. Some damage was also done in parts of Cuttack by floods towards the end of the month. In Darbhanga, Bhagalpur, and Purnea although deficient rainfall in August retarded transplantation, the September rainfall was sufficient for facilitating operations and benefiting the standing crop. The October rain was also beneficial to the crop, but some damage was done by excessive rain in the coast districts of Orissa. The prospects of the crop are on the whole very good.

(iii) An area of 39,000 acres was reported in March last to be under summer rice with an estimated yield of 14,000 tons, as against 53,000 acres and 18,000 tons last year.

**Madras (13.9 per cent of the total area under rice in British India).**—The total area sown up to the 1st December is estimated at 10,005,000 acres, which is 7 per cent below the area reported at the corresponding date of last year. As compared with the revised final estimate of last year (11,533,000 acres), the present figure shows a decrease of 13 per cent. It is, however, reported that the final area for this year, including the second crop, which has yet to be sown, is not likely to fall below last year's final figure. The season, on the whole, has been favourable and the outturn is expected to be normal or slightly above.

**Burma (13.3 per cent of the total area under rice in British India).**—The total area sown is reported to be 10,720,000 acres, which is 1 per cent above the revised area of last year. For the province as a whole, the average outturn per acre is estimated at 97 per cent of the normal and the total yield at 7,164,000 tons of unhusked rice (=4,800,000 tons of cleaned rice), which is 5 per cent above the estimate made at this date last year. In Lower Burma the rains were generally timely and sufficient, except in Akyab and Amherst, where late rains were unfavourable. In Akyab the November rains were heavy, causing some damage to the crop in ear, while in Amherst the absence of timely ripening showers somewhat affected the outturn. In Upper Burma the rains were generally favourable. A very large area in Shwabo was, however, affected by floods caused by the late heavy rains. The surplus available for export is expected to be 3,600,000 tons of unhusked rice (equivalent to 2,850,000 tons of cargo rice or 2,415,000 tons of cleaned rice), as against 3,480,000 tons of unhusked rice (equivalent to 2,750,000 tons of cargo rice or 2,330,500 tons of cleaned rice) estimated at this time last year.

**United Provinces (8 per cent of the total area under rice in British India).**—(i) The total area now reported amounts to 7,342,000 acres, as against 6,968,000 acres estimated at this time last year, or an increase of 5 per cent. As compared with the final estimate of last year (7,133,000 acres), the present estimate shows an increase of 3 per cent. The rainfall of July was favourable for the crop, but that of August was unevenly distributed and insufficient in the principal rice-growing districts. In the latter half of September there was heavy rain, which was generally excessive for the early (autumn) rice, though beneficial for the late (winter) crop. Towards the end of October, rain fell all over the provinces, and was valuable for maturing the late rice. For the province as a whole the outturn of early rice is at present estimated at 90 per cent of the normal and that of late rice as equal to the normal.

(ii) The area under hot weather rice was reported in October last to be 24,000 acres and 11,400 tons, as against 23,000 acres and 10,500 tons last year.

**Central Provinces and Berar (6.4 per cent of the total area under rice in British India).**—The total area is estimated at 5,226,000 acres (34,000 acres being in Berar) as against 5,086,000 acres last year or an increase of 3 per cent. The total yield is estimated at 1,647,000 tons (7,000 tons being in Berar) as against 1,481,000 tons for last year, showing an increase of 11 per cent. Climatic conditions at sowing time were favourable and germination and transplantation were successful. Resowing on a very small scale was necessary in a few places owing to excessive rain. The crop was slightly damaged in parts of certain districts on account of excessive rainfall. On the whole the seasonal conditions were favourable for rice.

**Assam (6 per cent of the total area under rice in British India).**—(i) The total area sown with autumn rice is estimated at 836,000 acres as against 823,000 acres, the revised estimate of last year, or an increase of 2 per cent. The average outturn per acre is estimated at 90 per cent of the normal, and the total yield at 237,000 tons, which is 28 per cent above the revised estimate of last year. The uneven distribution of rainfall prevented the crop from being a bumper one.

(ii) The area under winter rice is estimated at 3,256,000 acres, as against 3,126,000 acres reported at this time last year, or an increase of 4 per cent. A normal (100 per cent) outturn is expected and the total yield is estimated at 1,384,000 tons, which is 18 per cent above the corresponding estimate of last year. Since the issue of the first forecast, weather conditions have been very favourable.

(iii) An area of 250,000 acres was reported in March last to be under summer rice, this being the same as reported in the preceding year. The outturn was estimated at 96,000 tons, against 84,000 tons last year.

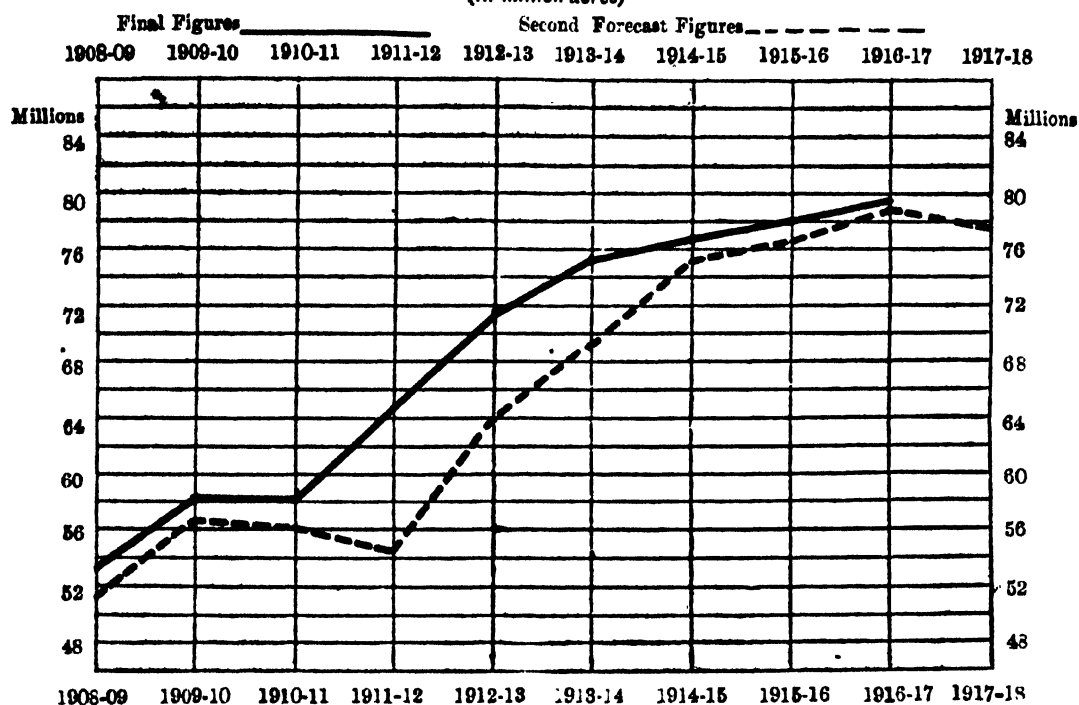

**Bombay (2.3 per cent of the total area under rice in British India).**—The total area is reported to be 2,436,000 acres (674,000 acres being in the Native States) as against 2,572,000 acres, the revised estimate of last year, or a decrease of 5 per cent. The total yield is estimated at 1,132,000 tons (307,000 tons being in the Native States) as against 1,162,000 tons, the revised estimate of last year, or a decrease of 3 per cent. In the beginning the rainfall was adequate and transplantation was done timely, but later the crop suffered to some extent from deficient rain in North Gujarat, Kathiawar, and in parts of the Karnatak. Elsewhere it progressed fairly well. Plentiful rains in August and September improved the crop in the Deccan and the Karnatak, but they proved somewhat excessive in Gujarat and the Konkan. The fall in October was again excessive, and was injurious to the ripe early crop and delayed harvesting operations everywhere.

**Sind (1.4 per cent of the total area under rice in British India).**—The total area is estimated at 1,086,000 acres (8,000 acres being in the Khairpur State), which is 15 per cent below the revised estimate of last year and is attributed to low inundation early in the season. The total yield is estimated at 399,000 tons, which is 21 per cent below the revised estimate of last year. The crop is reported to have been damaged by heavy rain in Larkana and Khairpur. In Thar and Parkar it is good, elsewhere it is fair.

**Chart.**—The chart below shows the variations in the second forecast estimates, as compared with those in the final figures for the last nine years. It should

be borne in mind that the large increases from 1911-12 to 1913-14 are due to a considerable extent to the addition of reporting tracts from year to year.

AREA OF RICE  
(In million acres)

**Rice crop in foreign countries.**—From the latest information published by the International Institute of Agriculture, Rome, it appears that in Japan the total area under rice is estimated at 7,608,000 acres as against 7,540,000 acres last year. In the United States of America the total area and yield are estimated at 969,000 acres and 667,000 tons as against 866,000 acres and 816,000 tons last year. In Italy

the estimates are 346,000 acres and 503,000 tons as against 352,000 acres and 511,000 tons last year. In Egypt the total area is estimated at 266,000 acres against 150,000 acres last year.

From un-official sources it appears that in Egypt water supply was plentiful and the crop is on the whole growing well, but the late-sown rice is not as satisfactory as the early one which is now flowering.

Harvesting of late sesamum, millet, groundnut and cotton continues. Standing crops are good. Livestock healthy. The price of unhusked rice in Rangoon has fallen and is normal. The market for white rice is quiet at rupees 235 for specials.

**Assam.**—The weather was seasonable. Sowing of mustard is nearly finished. Harvesting of winter rice and pressing of sugarcane continue. Plucking of cotton, harvesting of pulses, ploughing for autumn rice and jute and preparation of land for *jhum* cultivation are in progress. Prospects of crops are generally fair to good. Cattle disease is reported from three districts. Fall in price of common rice continues.

**Bengal.**—The week was rainless. Reaping of winter paddy continues briskly with good outturn. Spring sowings are still going on in places. Transplanting of summer rice has just commenced. The present conditions are favourable for the standing spring crops. The average price of common rice for the province is falling gradually.

**Bihar and Orissa.**—During the week light and scattered showers of rain fell in parts of Bihar and Chota Nagpur. There was no rain in Orissa. Harvesting of paddy and pressing of sugarcane continue. Standing crops are doing well. The price of common rice is almost stationary as compared with that of the preceding week. Cattle disease is reported from several districts. The condition of standing crops in the Feudatory States of Orissa is good.

**United Provinces.**—Light rain fell throughout the province and was beneficial to the crops. Irrigation and weeding and pressing of sugar-cane continue. Threshing of late rice is nearly complete. Prospects are good. Hail is reported from a few districts, but no damage has been done. Standing crops are doing well. There is very little cattle disease. Agricultural stock is in good condition. Prices are either stationary or rising slightly.

**Punjab.**—Except in the west light rain has fallen in nearly all the reporting districts. It was beneficial for standing crops. Picking of cotton and pressing of sugarcane continue. Yield of cotton is below normal and that of sugarcane is normal to good. Sowings of wheat and barley are in progress in some districts and are generally above normal. Standing spring crops are generally good. *Toria* is being reaped and the yield is normal. Stocks of food grains generally are sufficient. Cattle are healthy. Fodder is getting scarce in a few districts. Prices are generally stationary and range between normal and scarcity rates. Prices of wheat:—Ferozepore 7½, Lahore and Rawalpindi 8 and Ambala 8½ seers per rupee.
